  - II. Claims 2, 5, 7 and 9, drawn to using a discharge pulse current integrated value with a counting and comparison judging devices, classified in class 700, subclass 162.
  - III. Claims 11-15, drawn to using neither a discharge pulse number or discharge pulse current integrated value, classified in class 700, subclass 162.

The inventions are distinct, each from the other because of the following reasons:

Group I is described by figure 1. The special features are element numbers 7, 8 and 9.

Group II is described by figure 2. The special features are element numbers 19, 20 and 21.

Group III lacks all of the special features in Group I and Group II.

2. A telephone call was made to John C. Garvey on 10/14/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the
